A
ABC transporter genes and X-linked adrenoleukodystrophy 4–12
Abstract feature maps 135–139
Acetylcholine 273–280, 540–543 (L), 568 (BR)
  Aplysia, Ca^{2+} transients in release of 161–166
  consciousness and 273–280, 540–543 (L)
  cortical, in neuropsychiatric disorders 67–74
  nematode
    distribution/action/metabolism 17–18
    mutant studies 19
    synthesis/inactivation 17–18
Acetylcholine receptors
  nematode 18
  nicotinic, *see* Nicotinic ACh receptors
α-Actinin and NMDA receptors 292
Activity, quantitative trait loci 178
Addiction, drug 558
  CART peptides and 316–320
  cortical cholinergic inputs and 71–72
  dopamine system and 524, 558
ADH, *see* Vasopressin
Adiposity, body, regulation 62
cADP-ribose (cADPR) 488–494
  ACh release and 164–165
Adrenal steroids and cognition 422–426
Adrenoleukodystrophy, X-linked 4–12
Adrenomyeloneuropathy 4–5
Afferent neurones
  myosin heavy-chain production in infrafusal fibres and 182–183
  as sensing effectors 550
  visceral 187–188 (BR)
  see also Deafferentation
Aggregates, neuronal, *see* Neurone
Aging and cortical cholinergic input density 69
AIDS and chemokines and the brain 471–479, 510
Alcohol (ethanol)
  genes sensitive to, identifying 173–179
  midbrain dopamine and 525–526
Alimentary tract and satiety 45 (BR)
Alzheimer's disease
  amyloid-β as therapeutic target 485–486
  cell death and 371–372 (BR)
  chemokines and 510–511
  cholinergic neuropathology 275, 277, 556
  treatment aimed at 278
  FAK and PYK2/CAKβ and 262
  functional neuroimaging of retrosplenial cortex 314
  matrix metalloproteinases and 286
  presenilins and 439–443
  REM sleep disturbances 277
Amacrine AII cells and multiple rod pathways 498
Amino-acid-gated ion channels, excitatory and inhibitory 229
γ-Aminobutyric acid, *see* GABA
AMPA receptors 453
  dentate-gyrus basket cells 228
  distribution 455–456
  functional properties 453
  interneurones 229
  synaptic crosstalk and 385, 388
Amphetamines and midbrain dopamine 522, 524
Amygdala 207–208 (L)
  long-term potentiation 561–567
Amyloid-β (β-amyloid) and Alzheimer's-disease therapy 485–486
Amyloid precursor protein and γ-secretase 439–443
Amyotrophic lateral sclerosis (incl. familial forms), aggregate formation 194–195
Anaesthesia, acetylcholine-related mechanisms 278–279
Analgesia, Prof. K. Tsou's work 331 (O)
Anaphylatoxin receptors on neurones 397–402
Anchoring proteins and glutamatergic synapses 456–457
Ankyrin 406–407
Ant navigation 237–242
Anthelmintic drugs 19–20
Anticonvulsant activity of NPY 27–28
Antidepressants, neuroactive steroids and 415
Antidiuretic hormone, *see* Vasopressin
Antigen presentation and immune-mediated diseases of nervous system 30, 37
Antipsychotics, cortical cholinergic neurones and 71
AP-1 and Ras signalling 40–41
Aplysia
  cholinergic synapse, Ca^{2+} transients and neurotransmitter release 161–166
  long-term facilitation 41–42
Apoptosis (programmed cell death) 140 (BR), 371–372 (BR), 419–422
  FAK protecting against 262
  HSP70 protecting against 98
  in ischaemic stroke 395–396
  neuronal, *see* Apoptosis
  spinal interneurone, nerve lesions and 497 (L)
Appetite regulation/satiation 45, 62–67 (BR)
Apraxia 284 (BR)
Aptiganel, 535–536
2-Arachidonylglycerol and arachidonic acid, structure 80 (erratum)
Archistriatum
  gaze fields 132–134
  robust nucleus 432–436
Area 17 (V2), evolution 242–248
Area F5 of monkey 152 (L)
Area X of songbirds 432, 436
Arthritis, unilateral, contralateral effects 495–496 (L)
Artificial intelligence 2–3
Ascaris suum
  antihelmintic drugs 20
  FMRFamide-related peptides 20–21
Aspartyl proteinases, transmembrane domain-cleaving, presenilins as 441
Associative learning and catecholamines 146–151, 523
Associative LTP and fear conditioning 566
Astrocytes (and tripartite synapses) 208–215
  behaviour and 281 (BR)
  Ca^{2+} waves in 213
  as feedback elements at CNS synapses 212–213
  glutamate-dependent astrocyte-to-neurone signalling 210–211
  in neurotransmission
    modulation of neurotransmission 211–212
    neurotransmitter release by astrocytes 209–210
Atlases, *see* Maps
ATP-binding-cassette transporter genes and X-linked adrenoleukodystrophy 4–12
ATP-dependent Ca^{2+} pump of Ca^{2+}-storage organelles 164
Attention and cortical cholinergic inputs 68–69
Auditory cortical plasticity 74–80
Auditory language processing in Williams syndrome, neurophysiological marker for 201–202
Auditory system, perception 481–482 (BR)
  space perception, *see* Spatial perception
  visual motion stimuli 289
Auricle (pinna), space perception and 77–78
Autocrine signalling and Schwann-cell survival 409
Autoimmune disease (nervous system) and integrins 30–38

Autoimmune encephalomyelitis, experimental, *see* Encephalomyelitis
Autoimmune T cells, anti-myelin basic protein, neuroprotective effects 297–298
Autoimmunity in CNS, beneficial functions 298
Autonomic nervous system 188 (BR), 568 (BR)
  CART peptides and central autonomic network 319
  contralateral changes following neuronal lesions in 123, 124
Autonomous functions and sensing effectors 550–555
Avermectins and *Ascaris* pharyngeal muscle 20
Aversive stimuli and dopaminergic neurones 149–150
Avoidance, inhibitory, MAPK and 495 (L)
Axial mesoderm and motoneuron formation 323–324
Axon/neurite
  giant (crayfish), and escape behaviour 153–161
  growth, *see* Growth
  repair and regeneration, *see* Repair and regeneration
  structure, myelinating Schwann cells and regulation of 407–408
Axotomy, contralateral changes following 122–127

B

Balance, mutations affecting 263–269
Barn owl, auditory space representations 131
Barrels, cortical, rat vibrissae and 513
Basal forebrain and cortical cholinergic inputs 70–71
Basal ganglia and learning of sequential procedures 469
Basket cells, dentate gyrus, AMPA receptors 228
BCL2 and axonal outgrowth 269–272
BDNF, *see* Brain-derived neurotrophic factor
Bee navigation 237–242
Behaviour 141 (BR)
  CSF and 144
  developmental changes 185 (BR)
  eating, *see* Feeding/eating
  escape, crayfish 153–161
  exploratory, factors affecting 49–50
  genetics, *see* Genetics
  glial cells and 281 (BR)
  hippocampus and, transgenic-mouse studies 47–51, 302–304 (L)
  neurotoxins affecting 185–186 (BR)
  reproductive, *see* Sexual/reproductive behaviour
  species-specific characteristics of 48–49
  timing 282–283 (BR)
  visceral afferents and changes in 187 (BR)
Bicuculline, co-discovery 331 (O)
Binocular cues and time to collision 438 (L)
Bipolar cells and multiple rod pathways 498, 499
Birds
  pigeons, looming-sensitive neurones 216–217, 436–438 (L)
  songbirds, *see* Songbirds
  sound localization 128–135, 135
Blindness, night, congenital stationary 501
Blood, immune attack from, in ischaemic stroke 393–394
Blood–brain barrier 31, 34, 188–189 (BR)
  in immune-mediated disease, integrins and
    experimental disease 31
    human disease 35–36, 37
Blood cell formation (haematopoiesis) and neuropoiesis, comparisons/similarities 348–357
Blood–nerve barrier 31, 34
  in immune-mediated disease, integrins and experimental disease 31
    human disease 37
Body
  functions/homeostasis, and sensing effectors 550–555
  sides, signalling mechanisms between 122–127, 495–497 (L)
Bone-marrow transplantation, adrenoleukodystrophy 10
Bosch, Hieronymous 429–431
Brain
  in AIDS 471–479, 510
  chemokines, *see* Chemokines
  corticosteroid receptors 423
  degeneration, *see* Neurodegenerative disease
  development, *see* Development; Morphogenesis
  evolution, *see* Evolution
  FAK activation/regulation 260–261
  fluid spaces/CSF 143–145
  functional abnormalities, behavioural studies revealing 47
  immune attack from, in ischaemic stroke and 393–394
  injury, *see* Injury
  ischaemia, *see* Ischaemia
  lesion studies of memory 61 (L)
  maps, *see* Maps
  mind and, *see* Mind
  neuropoiesis in adult 355, 363
  paracrine transmission 381
  rat, *see* Rat
  satiety and the 45 (BR)
  sensory representations, *see* Sensory representations
  sequence-learning tasks and contributing areas of 464–471, 569 (erratum)
  songbird, sex differences 432–437
  tumours, matrix metalloproteinases and TIMPs and 286
  in Williams syndrome
    cytoarchitectonics 204
    structural MRI 202–204
  see also Blood–brain barrier; Blood–nerve barrier; Central nervous system
Brain and behaviour OU course, book accompanying 281–282 (BR)
Brain-derived neurotrophic factor (BDNF)
  contralateral communication across midline of body and 126, 127
  dorsal-root ganglion and 108
  inner ear and 267
  pyramidal-neuron firing rates and 225
Brain marrow and neuropoiesis 348–357
Brainstem
  eye-velocity memory for pursuit and 547–548
  interaural level differences in, analysis 130
Brn3.1 (*Brn3c*) 267
Broca's area, area F5 of monkey and homologue of 152 (L)

C

C3a and C5a receptors, neuronal 397–402
CA1 pyramidal cells
  LTP and 230
  synaptic crosstalk 382–388
Caenorhabditis elegans
  CAG repeat transgenic model 254
  FaRPs 21, 22
  neurotransmitters 16–24
CAG (polyglutamine)-repeat disorders 195–196
  Huntington's disease 195–196
    models 250–251
  models 253–254
  other diseases 195, 248
Caged-Ca^{2+} compounds, studies of Ca^{2+}-dependent exocytosis 88–93
CAG-repeat disorders, aggregate formation 195–196
Cajal–Retzius cells and schizophrenia 388–389 (L)
CAKβ 257–263
Calcineurin in hippocampal interneurones, absence 231–232
Calcium ion(s) 334–337, 385–388, 488–494
  Ca^{2+}-releasing messengers 488–494
  exocytosis and 88–93
  influx 334–337
  pineal gland and circadian rhythms and 553
  PYK2/CAKβ and 259
  sensor in bovine parathyroid 551–552
  signalling 334–337, 488–494
  synaptic crosstalk and 385–388
  synaptic membrane fusion and 462
Ca^{2+}–calmodulin, protein kinase C and, obstructive interactions 12–16
Ca^{2+}–calmodulin-dependent protein kinase II (CaMKII)
  amygdaloid, LTP and fear conditioning and 565
  in hippocampal interneurones, absence 231–232
  postsynaptic activation of 226
  synaptic membrane traffic and 459–460
Calcium-ion channels
  ACh release and 161–166
  blockers, in acute ischaemic stroke 535, 537

Calcium ion-storage organelles, ATP-dependent Ca^{2+} pump of 164
Calcium ion waves/transients
in astrocytes and synaptic circuits 213
neurotransmitter release and 161–166
Calmodulin
neuronal stores 12–13
see also Ca^{2+}–calmodulin
Calpacitins 12–13
Cancer, matrix metalloproteinases and TIMPs and 286
Cannabinoids, endogenous, as neuromodulators 80 (erratum)
Carcinogenesis, matrix metalloproteinases and TIMPs 286
Cardiomyocytes, necrosis and apoptosis 421
CART peptides 65, 316–320
Caspases 140, 420–421
ischaemic stroke and 395–396
Caspr 406
Catecholamine(s)
associative learning and 146–151, 523
receptors, nematode, mutant phenotypes 18
CCK, *see* Cholecystokinin
CD4 and HIV 472
Cell
death, *see* Death
gap junctions and signalling between, *see* Gap junctions
Cell-adhesion kinase β 257–263
Central nervous system
chemokines, *see* Chemokines
contralateral communication via 125–126
development, *see* Development
injury, *see* Injury
integrins and immune-mediated diseases of 30–38
nematode 23
neuropoiesis in adult 355, 363
NO targets 111
NPY effects 25–30
paracrine neurotransmission 377–382
peroxisomal function 4–5
rat, *see* Rat
Cerebellum
eye-velocity memory for pursuit and 547–548
learning of sequential procedures and 469
pontine nuclei as interface between cerebral cortex and 443–451
predictive function 2–3
in Williams syndrome, structural MRI 203
Cerebral cortex
cerebellum and, pontine nuclei as interface between 443–451
nicotinic ACh receptors, postsynaptic 557
Cerebral form of adrenoleukodystrophy
clinical presentation 6–7
pathogenesis 8–9, 11
Cerebral ischaemia, *see* Ischaemia
Cerebrospinal fluid and the brain 143–145
Cerebrovascular disorders and matrix metalloproteinases 286
Chemokines (in CNS) 471–479, 504–512
neurological disease and 509–511
AIDS 471–479, 510
receptors 475–478, 504–512
Chemosensors, complex, analysis 102–109
Chemotactic peptide receptors on neurones 397–402
Chloride-sensing neurones, leech 551–552, 554
Cholecystokinin (CCK)
Ca^{2+} signalling and 488–494
satiety and 45 (BR)
Cholinergic neurons
corticopetal, in neuropsychiatric disorders, 67–74
neuroimaging of activities 279
Cholinergic synapse
Aplysia, Ca^{2+} transients and neurotransmitter release 161–166
Cholinergic system/pathways
Alzheimer's disease and, *see* Alzheimer's disease
consciousness and 273–280, 540–543 (L)
Chromosome 7 microdeletion in Williams syndrome 204
Ciliary neurotrophic factor (CNTF) and CNTF-like ligands, neural differentiation and 367–368
neuronal survival and 405
Circadian rhythms 552–553, 554
CSF signalling and 145
EGR family and 168–169
sleep and 417–418
Citicholine 537–538
Clathrin 462–463
Clocks 552–553
timing of behaviour and 282
see also Oscillations/rhythms
Clomethiazole 536–537
CNTF, *see* Ciliary neurotrophic factor
Cocaine
dopamine in midbrain and 522–525
5-HT and 169–170
quantitative trait loci for sensitivity to 175–176
Cocaine- and amphetamine-regulated transcript peptides 65, 316–320
Cochlea
auditory cortex responses to lesions in 75–76
implants, and auditory cortical plasticity 79
mutations affecting 267
Coding of information, neuronal, temporal aspects 305–306, 309
Cognition
cholinergic system and
cortical cholinergic input and decline in cognition 69
nicotinic ACh receptors 555–557
corticosteroids and 422–426
Williams syndrome and 198–202
Cognitive maps, insect navigation and 237–239, 241–242
Cognitive neuroscience, representations, *see* Sensory representations
Coincidence detection in crayfish tail-flip circuits 154–156
Colliculus, inferior/superior, auditory-space representations and 128–135
Collision-sensitive neurones 215–220, 436–438 (L)
Commissural interneurones and contralateral communication across midline of body 126–127
Comparative Neuropsychology 283–284 (BR)
Compartmental models of single neurone behaviour 329 (BR)
Compasses and insect navigation 237–239
Complement anaphylatoxin receptors on neurones 397–402
Computation/computational neuroscience 308, 328–330 (BR)
Computer networks 480–481
Conditioned stimuli, dopaminergic system and 149
Conditioning, fear 561–567
Cones 499
cone function-deficient humans 501
and multiple rod pathways 498, 499, 501
Connexins 479–480 (BR)
Conopressin and its receptor, evolution 84
Consciousness 480–481 (BR)
cholinergic components 273–280, 540–543 (L)
Contactin-associated glycoprotein 406
Context-dependent processing and rat somatosensory cortex, 518, 519–520
Contralateral communication across midline of body 122–127, 495–496 (L)
Convulsions, *see* Seizures
Cortex/cortical area/pallium
cholinergic inputs, abnormal regulation in neuropsychiatric disorders 67–74
development, *see* Development
evolution, *see* Evolution
plasticity 74–80, 333
synapse 223–225
multiplicative scaling of synaptic strengths 223–224
in Williams syndrome, MRI 203

Corti, organ of, genes affecting 267
Corticosteroids and cognition 422–426
Corticothalamic connections, *see* Thalamus
Corticotrophin-releasing factor (CRF) and its receptors
evolution/physiology 82, 86–87
food intake regulation 64–65
Cortistatin (and its receptors), evolution/physiology 82, 87
Crayfish escape behaviour, 153–161
CRF, *see* Corticotrophin-releasing factor
CRIPT protein 293
Crustacean hyperglycaemic hormone 553
Cyclic ADP-ribose, *see* ADP-ribose
Cyclic GMP and NO, 111–112, 388–389 (L)
Cyclo-oxygenase 2 and ischaemic stroke 394
cyclops 323

Cytoarchitectonics of brain in Williams syndrome 204
Cytokines
experimental autoimmune encephalomyelitis and 32–33
JAK–STAT pathway in developing brain and 365–366
in neuropoiesis and haematopoiesis 353
Cytoskeleton
C3a/C5a complement receptors and 400–401
dynamics in dendritic spines 290–295

D

Deafferentation, cortical cholinergic, 192-IgG-saporin-induced 68
Deafness and hearing loss, mutations causing 263–269
Death (cell) 140 (BR), 371–372 (BR)
gp120 (HIV) and neuronal death 476–478, 510
ischaemic 395–396
neurological disease and 371–372 (BR)
programmed, *see* Apoptosis
see also Survival
Decapod crustacean stomatogastric ganglion, firing properties 222–223, 375–377
Dementia
with Lewy bodies, *see* Lewy body dementia
neuroactive steroids in 414
senile, attentional deficits and cortical cholinergic inputs in 69
Demyelinating disease
chemokines and 509
integrins and 30–38
peroxisomal 4–12
Dendritic morphology, pontine nuclei neurones 446–447
Dendritic spines, cytoskeletal dynamics in 290–295
Dentate gyrus
basket cells, AMPA receptors 228
synaptic crosstalk 382–388
Depolarization, peri-infarct 393
Depression (mood)
neuroactive steroids and 415
sleep and 417
Depression (synaptic), long-term, *see* Long-term depression
Descending contralateral-movement detector, locust 217, 218, 220
Desert Hedgehog 408
Development
behavioural changes during 185 (BR)
brain/neural/CNS (in general) 140 (BR), 185
chemokines 508–509
JAK–STAT pathway and 365–369
Otx genes and 116–122
rat, atlas 141–142 (BR)
CART peptides and 320
cortical
Cajal–Retzius cells and schizophrenia and 389–389 (L)
neocortical 332–334
ear 263–269
FAK and PYK2/CAKβ and 261
infrafusal/extrafusal fibre types in limb muscles 181–182
nerve/neurone
motoneurone development 321–326
nicotinic ACh receptors and 557–558
Schwann cells in 402–410
neural tube 486–488
speech/language, auditory cortex and 78, 79
subcortical structure, NO and 113–114
Diacylglycerol 334–337
Diffusion-weighted MRI, neural pathway tracking 373–374
Digestive tract and satiety 45 (BR)
Disector counting 54–55, 59
Donepezil in Alzheimer's disease 278
Dopamine (and dopaminergic system)
associative learning and 146–151, 523
nematode
distribution/synthesis/action/metabolism/inactivation 17
mutant studies 19
neuropsychiatric disorders and 70–71
reinforcement learning/reward and 146–151, 521–527, 558–559
Dopamine transporter (DAT) and psychostimulants 524–525
Dorsal root ganglion and BNDF 108
Dorsal ventricular ridge 332–333
Down's syndrome and Williams syndrome
cognitive profile compared 198–202
neuroanatomical characteristics from MRI compared 203–204
Drebrin 293
Drosophila
CAG repeat transgenic model 253–254
neuromuscular junction, synaptic homeostasis 223
otd gene, murine homologues of, in brain morphogenesis 116–122
Drugs (of abuse)
addiction, *see* Addiction
dopamine and 521–527, 558
genes sensitive to, identifying 173–179

E

Food, *see* Feeding
Forebrain
  auditory space representations 128–135
  basal, cortical cholinergic inputs and 70–71
Fosphenytoin in acute ischaemic stroke 535
Free radical scavengers in acute ischaemic
  stroke 537, 538
Frequency-dependent dynamics in rat
  somatosensory cortex 517–518
Frontal cortex
  frontal eye fields (FEF) 131–132, 134
    eye-movement tracking and 544, 548–549
  in Williams syndrome, MRI 203
Functional neuroimaging, emotional
  processes 310–316

G

G protein(s)
  inward-rectifying K^+ channels and,
    somatostatin receptors and 82
  presynaptic Ca^{2+} channels and 163–164
G-protein-coupled receptors, Ras–MAPK
  signalling pathway and 39
GABA
  consciousness and 541 (L)
  nematode
    distribution/action 17
    mutant studies 19
    receptors 18
    synthesis/inactivation 17–18
  Tsou's (Prof. Kang) work 331 (O)
$GABA_A$ receptors
  acute ischaemic stroke therapy and 536–537
  interneurones 229
  steroid modulation 412
GABAergic interneurones in hippocampus 228–235
GABAergic neurotransmission 378
GABAergic thalamic reticular and local-
  circuit neurones 339
Galanin and feeding 65
Ganglioside GM1 537–538
Gap junctions (and intercellular signalling) 479–480 (BR)
GAP-43, synaptic tagging and 255–256 (L)
Gap junctions (and intercellular signalling),
  rod–cone 498
Gastrointestinal tract and satiety 45 (BR)
Gaze fields, archistriatal 132–134
GDNF, *see* Glial-derived neurotrophic factor
Gene(s)
  alcohol/drug-sensitive, identifying 173–179
  in neuropoiesis and haematopoiesis 353
  see also Mutation studies
Gene transfer (and potential therapy)
  in adrenoleukodystrophy 9–10
  neuropoietic cells/stem cells 354–355, 363–364
Genetics
  behavioural
    spontaneous and induced mutations in
      studies of 100–102
    transgenic mouse studies of
      hippocampus and 47–51, 302–304 (L)
  molecular 186–187 (BR)
  neuromuscular disorders 44–45 (BR)
  see also Pharmacogenetics
Geniculate nucleus, lateral, NO and 112–113, 388–389 (L)
Genomic effects of neuroactive steroids 413
Giant axons of crayfish and escape
  behaviour 153–161
Glia/glial cells
  adrenoleukodystrophy and 6–9
  behaviour and 281 (BR)
  in immune-mediated disease of nervous
    system 32
  neuronal interactions with 281 (BR)
  synapses and 281 (BR)
    glutamate-mediated transmission and 456
    tripartite 208–215
Glial-derived neurotrophic factor (GDNF)
  fetal neuronal transplantation and 270–271
  neuronal survival and 406
Glioma, matrix metalloproteinases and
  TIMPs and 286
Glucagon-like peptide and feeding 65
Glucocorticoid receptors and cognition 422–426
Glucose, blood, neurones sensing 553
Glucose transporter I 98–99
Glucose-regulated proteins (GRP75/GRP78) 98–99
GLUTI 98–99
Glutamate
  in astrocyte-to-neurone signalling 210–211
  glial modification of transmission
    mediated by 456
  nematode
    distribution/action 17
    receptors 18
    synthesis/inactivation 17, 18
  neuropsychiatric diseases and 457
  uptake 453
Glutamate receptors
  amygdaloid, fear conditioning and 563–564
  cytoskeletal dynamics in dendritic spines
    and 290–295
  distribution 455–456
  functional properties 453–455
  in ischaemic stroke 392–393
    as target in drug trials 535–536, 537
  metabotropic, Ca^{2+}–calmodulin and
    protein kinase C and 15
  nematode 18
  postsynaptic density proteins and 291, 293, 456–457
  see also specific types of glutamate receptors

Glutamatergic synapses and transmission 378, 451–458
nematode, drugs targeting 19–20
nicotinic ACh receptors and 557
synapses on hippocampal interneurones 228–235
GM1 ganglioside 537, 538
cGMP, NO and 111–112
Gonadotropin, *see* luteinizing hormone
goosecoid 264
gp120 and neuronal death 476–478, 510
GPR7/GPR8/GPR24 receptors 85–86
Grafts, *see* Transplantation
Growth/outgrowth/sprouting and pathfinding/guidance/migration (of neurite/axon) 269–272
extrinsic factors inducing 270–271
intrinsic factors inducing 269–272
retina to optic tectum, *see* Tectum
schizophrenia and 388–389 (L)
tangential and radial migration patterns of cortical neurones 333
transmedian, contralateral changes following nerve lesions and 125–126
see also Repair and regeneration
Growth, axonal, *see* Axon
Growth factors in neuropoiesis and haematopoiesis 353
GRP75/GRP78 98–99
GTP-binding proteins, *see* G-proteins
GTPase activating proteins (GAPs) and memory 38–39
Guanine nucleotide-binding proteins, *see* G proteins
Guanine nucleotide-exchange factors (GEF) and memory 38–39
Guanine-releasing factor (GRF) and memory 39–40, 42–43
Guanylate cyclase and NO 111–112
Guillain–Barré syndrome, integrins in 36, 36–37
therapy aimed at 37
Gut and satiety 45 (BR)

H

Haem oxygenase I 99
Haematopoiesis and neuropoiesis, comparisons/similarities 348–357
Hair cells of inner ear, mutations affecting 266–267
HD, *see* Huntingtin
Head development and *Otx* genes 116–122
Hearing
auditory cortical plasticity and 74–80
mutations affecting 263–269
see also Auditory system
Heat-shock proteins 97–99
GLUTI 98–99
GRP75/GRP78 98–99
HSP27 98
HSP32 99
HSP47 98
HSP60 98
HSP70 97, 97–98
ubiquitin 98
Hebb synapse, tagging 255–256 (L)
Hebbian learning 76, 138–139
Hedgehog
Desert 408
Sonic 323
Helminths
drugs targeting nervous system 19–20
neurotransmitters 16–24
Hemisphere, left, language and 284 (BR)
Heroin and mesolimbic dopamine release 526
HHV-8 476
High vocal centre 432–436
Hippocampus
behaviour and, transgenic mouse studies 47–51, 302–304 (L)
interneurones, glutamatergic synapses onto 228–235
LTD 230–231, 424–425
LTP, *see* Long-term potentiation
memory and 38–44, 61 (L)
nicotinic ACh receptors 556–557
NPY actions 27–28
synaptic crosstalk 382–388
Histology, neural pathway tracking 373–374
History of neuroscience 429–431
HIV disease and chemokines and the brain 471–479, 510
Hnf3b 323
Homeobox genes (incl. *hox*)
Hoxa1 and *Hoxb1* 264, 265
motorneuron patterning and 321–323, 324
Homeostasis
bodily, and sensing effectors 550–555
in neuronal networks 221–227, 280 (erratum), 416 (erratum)
Horizontal cells and rod pathways 503
Hormones and contralateral changes following nerve lesions 125
Hox, *see* Homeobox genes
HSC70 97
HSPs, *see* Heat-shock proteins
Human herpes virus-8 476
Humoral mechanisms, contralateral changes following nerve lesion 125
Huntingtin
gene (*HD*) 249
CAG repeats, *see* CAG-repeat disorders
localization 249–250
proteins interacting with 249–250
Huntington's disease 248–255
models
cellular 252–253
mouse 250–251
neuronal inclusions/aggregates 195–196, 251–252
HVc 432–436
5-Hydroxytryptamine (serotonin)
Aplysia long-term facilitation and 41
cocaine and 169–170
nematode (distribution/synthesis/action/metabolism/inactivation) 17
paracrine transmission involving 377–382
social experience-dependent alterations in effects 158–159
5-Hydroxytryptamine receptors, nematode 18
mutant studies 19
Hyperglycaemic hormone, crustacean 553
Hypothalamus
CART mRNA in 317
feeding/body weight regulation and 62–67
neuropeptides and 62–67, 482 (BR)
osmolality and magnocellular neurosecretory cells of 551, 554

I

ICAM-1, monoclonal antibody to 537
Imaging, *see* Neuroimaging
Imitation 151–152 (L)
Immediate–early genes, EGR family as 167–173
Immune-mediated disease of nervous system, integrins and 30–38
Immune system
CNS repair and 295–299
HIV and 472–473
ischaemic stroke and 393–394
Immunotoxin
cortical cholinergic deafferentation produced by 68
memory research 61
Inclusions, neuronal, *see* Neurone
Infarcts, cerebral, depolarization and 393
Inflammation
neurogenic, contralateral changes 495–496 (L)
post-ischaemic stroke, 393–395
Inflammatory disorders, neurological, chemokines and 509
Information
processing
corticosteroids and 422–426
in learning of sequential procedures 466
in neuropsychiatric disorders 67–74
single neurones 328–329 (BR)
sensory effectors translating information into action 550–555
and sensory representations in brain 303–309, 543 (L)
information rates 304–306, 308–309
visual, eye-movement tracking and 544–550
Information theory, olfactory system 102–109
Ingestive behaviour, *see* Feeding/eating
Inhibitory amino acid-gated ion channels 229
Inhibitory avoidance and MAPK 495 (L)
Injury, brain/CNS
ischaemic, *see* Ischaemia
repair, *see* Repair and regeneration
seizure-induced, HSP70 in protection from 97, 97–98
traumatic, and C3a/C5a complement receptors 399–400
Innexins 479–480 (BR)
Inositol-1,4,5-triphosphate (and its receptors) 334–337
neurotransmitter-elicited intracellular Ca^{2+} release and 488–494

Insect
collision-sensitive neurones 216–220
navigation 237–242
Integrins and immune-mediated disease of nervous system 30–38
Intellectual decline and cortical cholinergic input 69
Intelligence
artificial 2, 3
human, IQ and 370–371 (BR)
Intercellular signalling and gap junctions, *see* Gap junctions
Interleukins, pro-inflammatory, schizophrenia and 388–389 (L)
Internet access, (*TINS*) 193
Interneurones
commissural, and contralateral communication across midline of body 126–127
hippocampal, glutamatergic synapses onto 228–235
spinal, nerve lesion effects on 497 (L)
Intracellular adhesion molecule-1, monoclonal antibody to 537
Intraparietal area, lateral, and eye movements 544
Ion channels 189 (BR)
amino acid-gated, excitatory and inhibitory 229
ligand-gated, steroid binding sites 413
see also specific ion channels
Ion concentrations, sensing effectors 551
IQ and human intelligence 370–371 (BR)
Ischaemia, cerebral (and ischaemic stroke), injury following 391–397
chemokines and 510
delayed 396
HSP70 in protection from 97–98
neuroprotective drug trials 535–540
Isk gene 268
Islet 1 (*Isl1*) and motoneurones 322
Isocortex, *see* Neocortex

J

JAK–STAT pathway in developing brain, signalling via 365–369

K

Kainate receptors on interneurones 229
Knock-in models of Huntington's disease 251
Knockout/null mutants
adrenoleukodystrophy gene 9–10
behavioural studies 100
drug-sensitivity genes 177–178
ear development 263–269
EGR1, endocrine abnormalities 171
emotional-learning studies 42–43
as Huntington's disease models 250–251
NPY, appetite/food intake 65
NT3, *see* Neurotrophin 3

L

L-type Ca^{2+} channels and ACh release 163
Laboratory manual 236 (BR)
Landmarks in insect navigation 237, 237–239
Language
auditory cortical plasticity in 78–79
evolution 151–152 (L)
left hemisphere and 284 (BR)
in Williams syndrome
auditory language processing, neurophysiological marker for 201–202
expressive language abilities 198
see also Speech
Lateral geniculate nucleus and NO 112–113, 388–389 (L)
Learning 2–3
associative, catecholamines and 146–151, 523
emotional, *see* Emotions
Hebbian 76, 138–139
quantitative trait loci 178
reinforcement, *see* Reinforcement
of sequential procedures, parallel neural networks for 464–471, 569 (erratum)
spatial, exploratory behaviour during 49–50
visual discrimination, EGR family and 168
Left and right side of body, signalling mechanisms between 122–127, 495–497 (L)
Leptin and feeding/weight regulation 45 (BR), 62–67
Leukaemic inhibitory factor in neural precursor cell cultures 363
Leukocytes and neurological inflammation 509–510
Leukomalacia, periventricular, schizophrenia and 388–389 (L)
Lewy body dementia (DLB)
cholinergic neuropathology 275–277
REM sleep disturbances 277
LH (LIM homeobox) family genes and motoneurones 321–322
LIF in neural precursor cell cultures 363
Ligand-gated ion channels, steroid binding sites 413
LIM homeobox and motoneurones 321–322
Limb muscles, development of infrafusal/extrafusal fibre types 181–182
Linguistic affect, Williams syndrome 198–200
Lobula giant movement detector, locust 217–220, 437–438 (L)
Locus coeruleus, noradrenergic neurones 151
Locust, collision-sensitive neurones 216–220, 437 (L)
Long-term depression 424–425
hippocampus 230–231, 424–425
Long-term facilitation, *Aplysia* 41–42
Long-term memory and Ras–MAPK signalling pathway 38–44, 495 (L)
Long-term potentiation (LTP)
amygdaloid 561–567
EGR1 and 167–168
hippocampal 230, 424–425, 463
corticosteroid receptors and 424–425
MAPKs in 42, 43, 495 (L)
postsynaptic 463
Looming-sensitive neurones, pigeon 216–217, 436–438 (L)
Lorenzo's oil 10
Lovastatin, adrenoleukodystrophy 11
LTD and LTP, *see* Long-term depression; Long-term potentiation
Lubeluzole 537, 537–538
Luteinizing hormone
and its receptors, evolution 84
luteinizing hormone β (as EGR-regulated gene) 168
deficiency in EGR1-deficient mice 171
Lysosomes, Ca^{2+}-dependent exocytosis 88–93

M

Macrophages and CNS regrowth following injury 296
Magnetic resonance imaging
neural-pathway tracking 373–374
Williams syndrome, neuroanatomical characteristics 202–204
Magnocellular neurosecretory cells and osmolality 551, 554
Malignant tumours, matrix metalloproteinases and TIMPs and 286
Map(s)/atlases/topography (brain/cortex, etc.)
of auditory space 128–135
developmental, rat 141–142 (BR)
feature maps 135–139
retinotectal, *see* Tectum
see also Cognitive maps; Cytoarchitectonics
MAPK, *see* Mitogen-activated protein kinase
MARCKS protein 14
Marr, David, meeting in honour 2–3
Marsden, C. David 1 (O)
Matrix metalloproteinases 285–287
Melanin-concentrating hormone and feeding 65
Melanocortin and food intake/weight regulation 63–64
Melanocytes and deafness 268
Melatonin 553
Membrane
cell, acute ischaemic stroke and drugs acting at 537, 538
peroxisomal, X-linked adrenoleukodystrophy and 4–12
synaptic, protein phosphorylation and traffic at 459–464
Memory 2–3, 470
episodic 311, 315
eye-velocity, for pursuit 547–548
lesion studies 61 (L)
long-term, Ras–MAPK signalling pathway and 38–44, 495 (L)
LTP in amygdala and 561–567
nicotinic ACh receptors and 557
quantitative trait loci 178
retrosplenial cortex and 311, 315
of sequential procedures 470
in transgenic mice, ethological approaches to studies of 47–51, 302–304 (L)
Meningitis, bacterial, and C3a/C5a complement receptors 399

Mesencephalon (midbrain)
auditory space representations in 128–135
CART immunostaining 318
dopamine and reward and 521–529
fetal, transplantation of cells from 270, 355
Mesoderm and motoneuron formation/patterning
axial 323–324
paraxial 324
Mesolimbic system and dopamine and reward 521–529
Metabotropic glutamate receptors, Ca^{2+}–calmodulin and protein kinase C and postsynaptic responses to stimulation of 15
Metalloproteinases, matrix 285–287
Metastasis, matrix metalloproteinases and TIMPs 286
Metrifonate in Alzheimer's disease 278
Mice, *see* Mouse
Microfilaments and glutamate receptors 291–292
Microglia, haem oxygenase I expression 98–99
Microscopy, neural pathway tracking 373–374
Microtubules
consciousness and acetylcholine and 541 (L), 542 (L)
glutamate receptors and 292–293
Midbrain, *see* Mesencephalon
Midline of body, signalling across 122–127, 495–497 (L)
Migration
neural-tube cells 486

Vagal afferents 188 (BR)
Vascular endothelium, *see* Endothelium
Vasopressin (ADH; antidiuretic hormone) and its receptors
evolution/physiology 82–84
osmolality and 551
Vectors, navigation (insects) 237–239, 242
Velocity memory for pursuit 547–548
VENT (ventrally emigrating neural tube) cells 486–488
Ventral paraflocculus (PF) and eye movements 544, 545, 547, 548
Ventral tegmental area, reward and dopamine and 521, 525, 558–559
nicotinic ACh receptors and 558–559
Ventrally emigrating neural tube cells 486–488
Ventricles, substances entering brain from 143–144
Ventricular ridge, dorsal 332–333
Very-long-chain fatty acids in X-linked adrenoleukodystrophy 4–12
lowering levels 10, 11
Vesicles, secretory
Ca^{2+}-dependent exocytosis 88–93
synapses, *see* Synaptic vesicles
Vibrissae and the rat somatosensory cortex 513–519
Viral encephalopathies and chemokines 509
Viralkines 476
Visceral endoderm and head development 116–122
Visceral perception 187–188 (BR)
Vision 327–328 (BR)
high-level 3
motion aftereffect 416 (BR)
Visual cortex
evolution 242–248
NO and 114
plasticity 74, 75, 77
Visual discrimination learning and EGR family 168
Visual function
modularization 287–288
motion processing, early, multi-functional interactions in 287–291
object processing 283–284 (BR)
posterior cingulate cortex and 311
Visual information and eye-movement tracking 544–550
Visual neurones, collision-sensitive 215–220, 436–438 (L)
Visual perception, *see* Perception
Visual system and NO 109–116, 388–389
Visually-based cognition, Williams syndrome 200–201
Voltage-gated electrical synapses, crayfish tail-flip circuits 154–156
Voltametric studies, 5-HT release 379–380
Volume transmission, CSF signalling and 144

W

Waterfall illusion 416 (BR)
Website, *Trends* 193
Weight, body, neuropeptides and regulation of 62–67
'Whisking' behaviour, rat 513–519
Williams syndrome 197–207
Word-category maps 137–138

X

X-linked adrenoleukodystrophy 4–12
